NFTs

NFT stands for non-fungible token. Non-fungible refers to unique or special. Opposite to it, fungible things can be easily replaced like currency notes, digital coins, etc. On the other hand, non-fungible tokens are unique and can't be replaced like a short video clip, digital art, etc. NFTs are similar to cryptocurrency units in that they are created and protected using blockchain technology.

In Evil Shiba Inu, the NFTs can be anything. The unique item in-game or any art in the world. In Evil Shiba Inu, they mean something; you can trade these NFTs to earn profit or use them to earn \$EVILSHIBA tokens. It's all up to you.

Games

Gaming should be fun. Rather than thinking about every penny you spend and taking up all your time, wouldn't it be great to play to earn?

The Play-to-Earn business model is the latest development in the games industry. It's a business model that embraces the concept of an open economy and provides benefits to all players who add value by contributing to the game world.

Play-to-earn games operate on smart contracts or blockchain programs that execute agreements in code that meet predetermined conditions. Evil Shiba Inu is also planning for a play-to-earn game that will give players ownership of digital assets to increase value. Furthermore, gamers can sell these digital assets on public blockchain exchanges.
